

HSU Healthier Together

HSU students are facing a healthcare shortage -- wait times are increasing and there is insufficient capacity to meet all student needs. Most students will use medical, counseling, or health education services during their time at HSU, and we also know a healthier campus has a positive effect on the success of every student on campus, however they interact with our programs. With limited community resources, HSU's Health and Wellbeing Services on campus are the only resource many students have.

We believe things are going to get better with students' physical and mental health as a top campus priority. Lend your voice to the discussion about how HSU can improve healthcare, structure future health fee adjustments, and prioritize increases to medical, counseling, and health education services. With increased capacity, wait times for counseling and psychiatric services can be decreased to help students more quickly, and we can expand Check It! and food security programs like Oh SNAP!, improve facilities and more.

We need your help prioritizing improvements to best serve all HSU students-- please share your thoughts about what Health and Wellness can do to improve mental and physical health for us all.

Your comments may appear in our report in aggregate form, but your personal information will not be shared and none of your responses will be used in an identifiable way.

This form is for feedback on health fee priorities, not to report an urgent medical condition or mental health crisis. If you are concerned about the safety of yourself or someone else, please contact UPD at 707.826.5555 or visit a local hospital emergency room.
